MICHAEL SHIGRIN SOKOL

Senior Product Designer | UX/UI · Complex Software · AI Products

+972 50-844-5938 | 3tdream@gmail.com | behance.net/3TDream | 3tdream.vercel.app

Product Designer and Manager with 10+ years across UX/UI, SaaS, gaming, AR/VR and 3D design. Combines user research, product strategy and hands-on prototyping to turn complex requirements into usable digital experiences. Built Mission Control to coordinate AI agents across product planning, implementation and quality checks. Part-time lecturer in UX/UI and game product development.

Selected product work

Mission Control

3TDream | AI-assisted product development

- Built a multi-agent workflow connecting product planning, architecture, implementation, QA, security review and deployment.
- Developed approval and verification stages, task tracking and reusable project knowledge to support iterative delivery.
- Built web applications and API integrations with AI-assisted development tools, using React, Next.js, TypeScript, Vercel and Neon.

Professional experience

Product Designer / Product Manager

AR Software | May 2023 - May 2026

- Led product design from research and requirements through user flows, interactive prototypes and implementation collaboration.
- Designed web and mobile interfaces for connected products, including onboarding, device setup, monitoring and feedback workflows.
- Created dashboards translating sensor data into KPIs and alerts; investigated usability and information-visualization gaps.
- Worked with engineering and R&D teams to align user needs, product priorities and technical constraints.

Art Director & Product Manager

BrainyOdds | Aug 2020 - Jun 2022

- Defined product vision, roadmaps and UX/UI for a gaming SaaS platform.
- Coordinated design, animation, 3D and R&D work across product development and implementation.
- Translated business requirements and user needs into product concepts, prototypes and feature priorities.

UX/UI & 3D Designer

Freelance | Dec 2017 - Nov 2020

- Designed interfaces, interactive prototypes and 3D assets for gaming, SaaS and AR/VR projects.
- Developed user flows, modular interface patterns and data-visualization concepts with client teams.
- Contributed to AR-based training experiences and product visualization.

Selected client projects: Playtika (House of Fun), Rafael and NFH Agency.

Tools and methods

Product and UX
Product discovery, user research, usability testing, roadmapping, feature prioritization, wireframing, interactive prototyping, design systems, Agile, Scrum and Kanban.

Design and 3D
Figma, Adobe Creative Cloud, Adobe XD, Blender, Maya and Unity.

AI-assisted development
Codex, Claude Code, React, Next.js, TypeScript, API integrations, GitHub, Vercel, Neon and Visual Studio Code.

Education

Graphic & 3D Design
Israel Animation College | 2015 - 2017

Bachelor's Degree in Design and Media
Specialization in 3D
Tiltan School of Design | 2008–2012

Practical Engineer Diploma in Electronics and Computers
Midrashiyat HaGalil | 2001–2003
